Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over the disclosed prior art and in further view of Glang et al. (US 4,467,519).

- a. The Disclosed prior art discloses the limitations of:

Forming a window (1, fig. 1A) in the polysilicon layer;

Doping the predetermined area (5, fig. 1B); and

Forming spacer (9, fig. 1D) in the self-adjusting manner with respect to an edge of the window.(page 5, line 8 – page 7, line9)

- b. Glang discloses:

Diffusing the dopant outward from the first region (col. 6, Ins. 41-50).

Therefore one of ordinary skill in the art would combine Glang with the disclosed prior art in order to create a base with sufficient width and doping to avoid punch-through.

Response to Arguments

3. Applicant's arguments filed 3-28-03, pertaining to claims 1-12, have been fully considered but they are not persuasive. The applicant argues that the dopant is not diffused outward from the monocrystalline substrate as claimed. However the claims

taken in their broadest scope do not read on diffusing from the substrate. The claims states that "...diffusing the dopant outward from the first region..." However outward is not defined as into (which would be away from the bottom surface of the substrate) or away from the upper surface of the substrate. In any case since the first region is defined only being adjacent to the second region, therefore the second region is the polycrystalline silicon layer and the diffusion is outward from it or that the region formed during the out-diffusion which is further annealed when forming the emitter region is diffused outward toward the bottom surface of substrate.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
